

## **MEPCO Introduces the Sentinel® Condensate Pump Line**

February 6, 2013

**Grand Rapids, Michigan** – MEPCO is announcing the introduction of our new Sentinel® Condensate Pump Line. Sentinel® Condensate Pumps are complete compact assemblies, returning condensate to boiler feed receivers or directly to boilers. This pump line offers proven condensate recovery from comfort heating systems or low pressure steam process heating systems where water recovery is economical. It can also be used in a combination of such systems.

The cut sheet is available on our website under the Literature section. You can place your orders immediately. As always if you have any questions please contact customer service.
