

MEPCO Offers Line of Non-Electric Condensate Pumps

For Immediate Release – August 24, 2014

Grand Rapids, MI – MEPCO announces the launch of our Non-Electric Pressure Operated Condensate Pumps. These pumps provide a fail-safe condensate return for high efficiency heating. We can retrofit any current system with a mechanical pump. You can end mid-season burnout and boiler shutdowns and get years of continuous use, all while allowing high temperature condensate returns that save you money.

Attached you will find a new cut sheet for the Non-Electric Condensate Pumps; it is also available on our website. You can place your orders immediately. As always, if you have any questions please contact customer service.
