

MEPCO Introduces a New Quick Vent

December 12, 2012

Grand Rapids, Michigan – MEPCO is announcing the design of a new vacuum lock vent that provides quick air vent elimination on steam mains where only air and steam are found. Quick vents are intended for location on all risers and steam lines where large volumes of air must be discharged and no condensate is present.

The cut sheet is available on our website under the Literature section. Your immediate orders are welcome, of course. As always, if you have any questions, please contact customer service.
